The progress measures compare pupils' key stage 2 results to those of other pupils nationally with similar prior attainment.

Our first step is to put all pupils nationally into groups based on their key stage 1 results, so that we have groups of pupils who have similar starting points to each other. We do this by working out a pupil's average performance at key stage 1 across reading, writing and mathematics. We allocated points to key stage 1 teacher assessments to create a key stage 1 average point score for these pupils. Pupils with similar average point scores are then allocated to prior attainment groups. Further details of this are in pages 14-17 of the technical guidance.

Our second step is to identify pupil's key stage 2 achievements.

For reading and mathematics, key stage 2 test results are reported as scaled scores between 80 and 120, with 100 as the national standard. The scaled score for each subject is used as the pupil's key stage 2 outcome in the progress score calculation.

For writing progress scores, pupils were allocated points for each of the three teacher assessment key stage 2 categories (page 20-21).

Our third step is to calculate individual pupil's progress scores. Progress scores are calculated for individual pupils for the sole purpose of constructing a school's progress 2 score. We will not publish pupils' progress scores. We will only publish the school's progress scores.

The calculation is as follows:

- We take the individual pupil's key stage 2 result (for example in reading).
- We compare this to the national average key stage 2 attainment for pupils with similar key stage 1 average points scores to them.
- A pupil's progress score is the difference between their actual KS2 result and the average result of those in their prior attainment group.
- If Emily, for example, received 102 in reading at KS2 and the average KS2 reading score for her prior attainment group was 101 her progress score would be +1.

Our final step is to create a school level progress score. We do this by adding together the progress scores of all the pupils in year 6 and dividing by the number of pupils in the school.

We repeat this process for each of reading, writing and maths. Schools will have three progress scores:

- Average progress in mathematics;
- Average progress in reading; and
- Average progress in writing.

There is no aggregated (overall) key stage 2 progress score.

### **Interpreting progress scores**

Progress scores will be centred around 0, with most schools within the range of -5 to +5.

- A **score of 0** means pupils in this school on average do about **as well** at KS2 as those with similar prior attainment nationally.
- A **positive score** means pupils in this school on average **do better** at KS2 as those with similar prior attainment nationally.

### **Clore Shalom School**

• A **negative score** means pupils in this school on average **do worse** at KS2 as those with similar prior attainment nationally.

A negative score does not mean that pupils did not make any progress, rather it means they made less progress than other pupils nationally with similar starting points.

For example, if a school has a maths score of -4 this would mean that on average pupils in this school achieved 4 scaled scores less than other pupils nationally with similar starting points.
